Stargazers

Each data point corresponds to at least one stargazer event. The time resolution is one day.

Forks

Each data point corresponds to at least one fork event. The time resolution is one day.

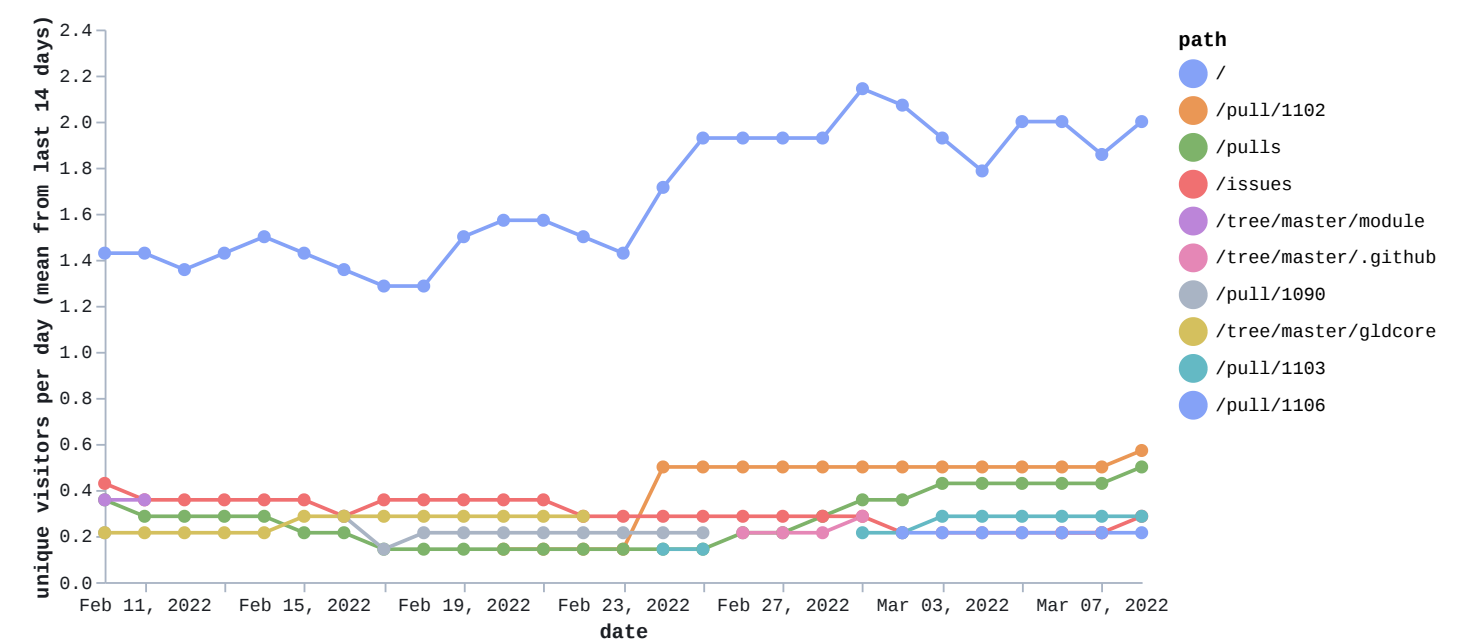

Note: Each data point in the plots shown below is influenced by the 14 days leading up to it. Each data point is the arithmetic mean of the “unique visitors per day” metric, built from a time window of 14 days width, and plotted at the right edge of that very time window. That is, these plots respond slowly to change (narrow peaks are smoothed out).

The chart displays the daily mean number of unique visitors from various referrers over a period of approximately three weeks. The y-axis represents the mean number of unique visitors per day, ranging from 0.0 to 1.8. The x-axis shows the date, from February 11, 2022, to March 7, 2022. The legend identifies the referrers by color: github.com (blue), Google (orange), docs.gridlabd.us (green), Bing (red), hub.xn--gzu630h.xn--kpry5... (purple), mail.google.com (pink), DuckDuckGo (grey), github-wiki-see.page (olive), and marielouisearl.com (teal).

Key observations from the chart include:

- github.com** (blue line) shows a general upward trend, starting around 1.05, dipping to 0.8 in mid-February, and then rising to a peak of nearly 1.6 in late February before fluctuating between 1.35 and 1.5.
- Google** (orange line) starts around 0.55, fluctuates between 0.6 and 0.8, and then shows a significant increase starting in mid-February, peaking at approximately 0.95 in late February before settling around 0.75.
- docs.gridlabd.us** (green line) remains at 0.0 until late February, then rises to a steady 0.2 by early March.
- Bing** (red line) starts around 0.15 and drops to 0.0 by mid-February, remaining there.
- hub.xn--gzu630h.xn--kpry5...** (purple line) remains at 0.0 throughout the entire period.
- mail.google.com** (pink line) remains at 0.0 throughout the entire period.
- DuckDuckGo** (grey line) remains at 0.0 throughout the entire period.
- github-wiki-see.page** (olive line) remains at 0.0 until late February, then rises to a steady 0.05 by early March.
- marielouisearl.com** (teal line) remains at 0.0 throughout the entire period.
